ALEXANDRA MADALINA DASCALEANU

F R O N T - E N D   W E B   D E V E L O P E R

PROFILE

am passionate and dedicated with strong foundation in front-end development, problem-solving, teamwork and interaction with new people. With a background in archives and IT industry, I thrive in dynamic environments where I can apply my skills to create innovative solutions. I am always eager to learn and grow, continuously seeking opportunities to expand my expertise and take on new challenges. I am confident in my ability to contribute effectively and productively to a company.

My goal is to continually expand my skill set and stay up-to-date with the latest technologies for my profesional development.

WORK EXPERIENCE

Student Front-end developer (project-based training) at IT School, Timisoara, Romania | February 2023 - August 2023
Self-directed learning / Udemy courses

- I completed a comprehensive IT course focusing on HTML, CSS, JavaScript, React.js, and GitHub
- I developed and launched multiple independent projects, showcasing the ability to create responsive, user-friendly websites
- I collaborated with peers on team-based projects, utilizing GitHub for version control and collaborative coding
- I applied newly acquired skills in front-end development, enhancing confidence and proficiency in building web applications.

Archivist at Price Banks, Iasi, Romania | 2020 - 2021

EDUCATION

IT School, Timisoara, Romania
Front-end web development | February 2023 - August 2023
Tools: HTML, CSS, Bootstrap, JavaScript, React, GitHub
I acquired a solid foundation in HTML, CSS, JavaScript, React.js, and GitHub. I developed both individual projects, utilizing GitHub for version control and collaboration. By the end of the course, I gained the ability to create functional, user-friendly and responsive websites using these technologies.

Online Courses

Udemy: React course - 55,5 h
Udemy: JavaScript Script - 68,5 h
Udemy: CSS course - 37,5 h
Udemy: Web/Mobile design, UI/UX Design / Figma 25,6 h

In addition to my formal IT course. I completed several specialized courses on Udemy to deepen my expertise in front-end development. These courses allowed me to build on my foundational skills, covering advanced topics and best practices. As a result, I now have greater confidence in my abilities as a front-end developer.
